

MAIZE PELLET

PREMIUM QUALITY CORN MEAL WITH ADDED MOLASSES

BALANCED MAIZE PELLET FEED

DESIGNED FOR MILKING ANIMALS

Corn can be used in many different types of back grounding and finishing diets, and it can serve as a supplement in forage-based diets for Milking animals. Compared with other feed grains, corn is lower in protein and slightly higher in energy. Corn contains approximately 70 percent starch on a dry-matter basis. Other important fractions in the corn kernel include protein, fiber and minerals. To make the Maize as premium balanced feed, camron has designed maize pellet with molasses.

Ingredients: Crushed corn, corn by products, Rice Polish, De-oiled Rice Bran, Molasses, Soda, LSP and Toxin Binder.

NET WT. 50 KG/110 LBS
PACKING : BOPE BAG

- CP%
- NDF%
- Escape Protein
- TDN

Feeding Instruction: : Don't feed any other grain along with this feed. Over feeding can cause a Acidosis.

Improves Milk & Fat level

Promotes rumen bacterial growth

Good source of Fat, Energy and Protein

Promotes forage digestibility and rumen cycling.

Free from Urea

High energy & fibre

Balanced ration

Premium quality imported minerals

High energy & fibre

Safe & easy digestible
